

SURAJ S PILLAI

Senior Flutter Developer • Mobile App Engineer • Cross-Platform Specialist | 3+ Years Experience

surajspillai57@gmail.com | +91 9567846357 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Ernakulam, Kerala, India

PROFESSIONAL SUMMARY

Senior Flutter Developer with 3+ years of hands-on experience shipping 5+ production apps to Google Play Store and Apple App Store. Expert in Dart 3 (null safety), Riverpod, and BLoC for scalable, predictable state management. Proven track record: 30% user engagement improvement and 15% app performance optimization via Clean Architecture (MVVM), comprehensive widget/unit testing, and Flutter 3.x best practices. Skilled in Firebase (FCM, Firestore, Auth), REST APIs, Laravel, Django backends, and CI/CD pipelines (GitHub Actions, Bitbucket). Available for immediate interviews and open to relocation.

WORK EXPERIENCE

Senior Flutter Developer | SLBS Marklance Infotech Pvt Ltd

Ernakulam, India | Jan 2026 – Present

- Implemented predictable and scalable state management using both **BLoC** and **Riverpod**, and successfully integrated **Razorpay** for seamless, secure in-app payments.
- Deployed production-ready applications to both Google Play Store and Apple App Store, utilizing **Xcode** and **Bitbucket** for robust version control and deployment pipelines.
- Architected robust data layers utilizing **Firebase** and **PHP Laravel** as core backends, integrating and testing complex **REST APIs** via **Postman**.
- Ensured pixel-perfect, highly responsive UIs across all devices using **flutter_screenutil** and **SafeArea**, while handling complex page routing and **deep linking** via **go_router**.
- Managed multiple simultaneous application lifecycles, balancing internal company products with fast-paced client deliverables in a collaborative team environment.
- Led weekly client communications to gather functional requirements, provide technical updates, and ensure precise alignment with business needs.

Mobile App Developer | Cybios Technologies Pvt Ltd

Ernakulam, India | Jan 2024 – Dec 2025

- Used **Firebase** and **Django** as core backend data stores across multiple production apps, and integrated third-party services including **phone.email** for secure phone/email authentication, **Pushy** for high-reliability push notifications, and **Razorpay** for seamless in-app payment flows.
- Led the design, development, and shipping of Android and iOS applications on Google Play Store and Apple App Store, covering the full Software Development Lifecycle (SDLC) from idea to release.
- Built a robust data layer by wiring Django **REST API** calls into a clear request/response flow, adding layered caching with Dio and a caching fallback flow using Hive, so the app stays usable even on poor networks.
- Implemented **deep linking** with **go_router** so users can jump directly into key app screens (offers, order details, support) from links and notifications, improving re-engagement and overall navigation experience.
- Designed a custom **responsive configuration** system for Flutter that centralizes screen adaptation rules, avoiding fragile, scattered layout logic and reducing the need for external packages like **flutter_screenutil**.
- Developed lightweight in-app **gamification** experiences using the Flutter **Flame** game engine (mini-games, animated meters) to make routine flows feel more rewarding and increase user engagement.

Flutter Developer Intern | Luminar Technolab

Ernakulam, India | Jun 2023 – Dec 2023

- Built and launched production-ready mobile applications, resulting in a 30% improvement in user engagement metrics post-launch.
- Collaborated closely with UI/UX designers to translate Figma mockups into pixel-perfect, responsive, and animated layouts using Flutter widgets.
- Leveraged GetX for state management, dependency injection, and route management, reducing code complexity by 25% compared to previous MVC patterns.
- Connected Firebase services, including Authentication, Firestore, and Realtime Database, for secure user management and real-time data synchronization across clients.
- Employed essential third-party Flutter plugins, including **google_maps_flutter** and **location**, to enhance app functionality with geolocation, routing, and interactive maps.

TECHNICAL SKILLS

Core Flutter & Mobile: Flutter 3.x, Dart 3 (Null Safety), Widget Lifecycle, **Responsive UI**, **Material Design**, Cupertino Widgets, **Animations**, **Accessibility (Semantics)**, **Localization (l10n/i18n)**, Platform Channels, **Xcode**, **Flutter Flavors**

State Management: Riverpod, BLoC/Cubit, Provider, GetX, **Dependency Injection (get_it/injectable)**

Backend & Database: **Firestore**, **FCM**, Auth, Realtime DB), **REST APIs**, **Laravel**, **Django**, SQLite, Hive, Shared Preferences, Dio Interceptors, **Push Notifications**

Architecture & Testing: **Clean Architecture (MVVM)**, **TDD**, **Unit Testing**, **Widget Testing**, Integration Testing, **Performance Profiling**, App Bundle Optimization

DevOps & Tools: Git, Bitbucket, **GitHub Actions**, **CI/CD**, **Postman**, **Figma**, **Android Studio**, VS Code

Programming Languages: Dart 3 — **Expert (null safety, async/await, Isolates)**, PHP — Intermediate, Python — Intermediate, Kotlin (Platform Channels), Swift (Platform Channels)

Soft Skills: **Agile/Scrum Methodologies**, Client Communication, Team Collaboration, **Code Review**, Requirements Gathering

PROJECTS

Home Hope (Healthcare Super App — Live on Play Store & App Store) | [View App](#)

- Engineered a feature-rich healthcare Super App unifying 10+ distinct medical roles (Doctor, Nurse, Ayush, Medical Supplier, Patient, etc.) under a single cross-platform system.
- Implemented real-time GPS-based geolocation service for routing and matching nearby home-visit healthcare providers, significantly reducing provider match time.
- Architected hybrid consultation flows (telehealth, in-clinic, home visits) integrated with Razorpay payment gateway for seamless transactions.
- Engineered role-based access control (RBAC) with Laravel API Authentication (Sanctum), defining isolated data scopes and secure token management for each of the 10+ distinct user types.

SLBS LMS (Live on Play Store & App Store) | [View App](#)

- Engineered a fully featured Learning Management System (LMS) tailored for students across academic institutions.
- Developed comprehensive modules including automated attendance tracking, online and supplementary examinations, and secure certification generation.
- Integrated live and recorded online video session capabilities to support remote and hybrid learning environments.
- Optimized app performance using Flutter DevTools profiling — eliminated redundant widget rebuilds and implemented lazy loading for large course catalogs, achieving smooth 60fps rendering.

SLBS Connect Parent (Live on Play Store) | [View App](#)

- Architected a Flutter-based Parent Portal using BLoC and Dependency Injection (get_it/injectable), streamlining parent query resolutions.
- Engineered core academic modules with dynamic data visualization dashboards (fl_chart) for real-time attendance and exam performance insights.
- Integrated Razorpay, Socket.IO/Firebase, and Syncfusion multimedia streaming with strict anti-screenshot privacy policies for protected content delivery.
- Implemented offline-first data caching using Hive and Dio interceptors, ensuring uninterrupted access to academic records on poor or no network conditions.

SLBS CRM (Internal Production)

- Developed a role-based internal CRM using GetX, automating manual tracking workflows for Business Development Executives.
- Integrated native telephony APIs (call_log, phone_state) for seamless in-app calling, automated interaction tracking, and dynamic lead status updates.
- Implemented persistent background and foreground services for continuous data synchronization, with Firebase security suite and app-wide screenshot prevention.
- Built a dynamic lead analytics dashboard with conversion funnel visualization and real-time status tracking, enabling data-driven outreach decisions for the sales team.

Shrimp App (E-commerce Platform)

- Architected a multi-role e-commerce platform (Seller, Buyer, Admin + 2 roles) using Django REST API and Riverpod for predictable, scalable state management.
- Integrated Firebase Push Notifications (FCM) and employed Flutter Flavors for efficient multi-environment build management and role-specific functionality.
- Implemented persistent cart management, advanced product filtering, and real-time order status tracking with Hive local storage for offline fallback.

EDUCATION

B.Sc. in Computer Science, University of Kerala | 2020 – 2023

Higher Secondary (Computer Science), St. John's HSS Mattom | 2018 – 2020

SSLC, HSS Chettikulangara | 2017 – 2018

CERTIFICATIONS

Flutter & Dart - The Complete Guide [2024 Edition], Udemy | Jan 2024

Covered advanced topics including state management (BLoC, Riverpod), animations, and performance optimization.

NACTEC Certification in Flutter

Recognized for excellence in cross-platform app development.

Flutter Hands-on Training, Luminar Technolab

Gained practical experience in full-stack app development, from UI design to backend integration.

Certificate of Participation, Internship Studio

Enhanced professional skills in teamwork, communication, and project management in a corporate environment.
